IN 34TH YEAR—EVERY WEEK SINCE 1905

HAMLIN, JONES COUNTY, TEXAS, FRIDAY, FEBRUARY 10, 1939

NUMBER 15

\$125.00 to Be Given In Show Prizes Saturday

Plenty Of Entertainment All Day . . . Two Concerts By Hi Band

Hamlin Chamber of Commerce, Hamlin Rotary Club, Hamlin Lions Club, Hamlin School Board and the Woman's Literary Club are hosts to the people of the surrounding country this Saturday, February 11.

Besides an assemblage of some choice Livestock, including fat calves, fine hogs, sheep and other animals, there will be on display a lot of extra show animals by farmers who desire to let their neighboring communities understand what they have.

The Woman's Literary Club is featuring a form of entertainment that will appeal to men as well as women.

The entire show will be in the yards of the former Home Lumber Company to the rear of the John T. Day Hardware store. The weather will not hinder, for there are lots of sheds, plenty of places to keep warm and dry.

In the office building of the former company, will be the ladies show of "Hobby articles" and in an adjoining room will be a free moving picture of Hamlin and many interesting things about this town. It will take several minutes to see this lovely picture done in technicolor.

On the streets of Hamlin will be parades, and band concerts twice during the day. Special attractions will be at 10:00 A. M. and 4:00 P. M. Following the band concert at 10 A. M. the stock judging will take place, and this will continue till in mid-afternoon.

Mrs. Ferguson cooperating in the entertainment will have her programs on the screen starting perhaps about eleven o'clock A. M. and will continue through the day.

Prizes will be awarded to the winners of stock furnished by the Hamlin F. F. A. Boys. They will present fat calves, fat hogs and sheep. Hamlin merchants have arranged to make special prices to customers on Saturday, and some will also will include Friday too.

If you have not been in Hamlin come over Saturday and spend the day, visit any place you may desire. For instance, drive around and see the great warehouses that contain more than 60,000 bales of the 1937-38 cotton. Go down and inspect Hamlin's Great Hatchery, see how they make chicks by the thousands. And did you know that here in Hamlin is a bread factory-bakery which will entertain you and if it should be cold that day, that is a nice warm place to pass some time. O, Yes, certainly all that cooking will make you hungry. But don't fail to inspect the Eddie Jay's Bakery.

The Herald is an interesting place to those who do not know how printing is done, and you may spend part of your day visiting in the New Herald office. You are very welcome.

Stock farmers who would like to see 200 fine feeder calves, eating trench silage, just go out the street towards the ball park and right there near by, the Dick Moore cattle enterprise will be for your inspection. It is a pretty picture. There should not be a dull moment in Hamlin this Saturday.

Tell your friends to come over and let's be neighborly.

Miss Laura Q. Martin who finished her senior work at mid-term in North Texas State Teachers College in Denton, has accepted a position as teacher of English and Typing in the Mart High school, and began her work there this past Monday.

The Herald Anywhere 1 Yr. \$1.00

HELP YOUR SCHOOL LIBRARY

Recently the Elementary P. T. A. assisted the school in giving Placement tests compiled by the Department of Education to show what a school is deficient in according to State Standards.

We found the Elementary school Library far below the average in literature, and the faculty immediately went to work tabulating the contents of the Library and below are the results. The Library consists of two sets of Reference books, which are not exactly suited to that school, and one hundred and forty books, most of which are in bad condition, due to age and much use.

There are approximately two hundred forty students using these books, consisting of the Fourth through the Seventh grades which leaves about one-half without books.

With the assistance of the P. T. A. Room Mothers and other sources,

\$30.00 has been expended recently for books which will add ten or fifteen to the Library.

The suggestion has been made that we appeal to those having books suitable for this group, and having no use for them, to donate them to the library, and help bring this up to standard. Any member of the P. T. A., Faculty, or school child will be glad to come get the books, if notified.

The State Department of Education furnishes a list of books that are recommended for school libraries, but any book that is deemed proper for a child between these ages will be accepted by the school.

Lets go to work and assist in this work, remembering that many children do not have access to good literature except in the Public school, and as the foundation is laid in the Elementary school, we certainly should be interested and assist in every way possible to help these students be prepared for High School.

MRS. Q. MARTIN,
President Elementary P. T. A.

J. F. MIXON DIED IN MEMPHIS FRIDAY

A former Hamlin citizen, J. F. Mixon passed away in Memphis, Texas on Friday, February 3, at 1:30 P. M. Age 81 years.

Mr. Mixon lived in Hamlin many years. In 1914 he operated a picture show in Hamlin and later engaged in mercantile business here. He was a very likeable man, a friend-maker. In recent years he became very feeble.

The deceased is survived by his wife and nine children, all of whom were present when the end came. They are Howard Mixon and Mrs. C. T. Jarvis of Tuttle, Oklahoma; Mrs. B. E. Durrett, Lakeview, Texas; A. M. Mixon, Lamesa, Texas; Arthur Mixon, Lubbock, Texas; B. E. Mixon, White Face, Texas; Mrs. Joe Dillingham, Hamlin; Mrs. Frank Cox, Clovis, New Mexico; and Charlie Mixon of Memphis, Texas.

Mr. Mixon was a member of the Methodist Church.

Funeral services were held on Saturday and burial was in the Memphis Cemetery.

Several extra copies of the Herald are going out this week as a part of the Livestock Show Saturday advertising. If you have not been reading the Herald, look over it and then make up your mind to take it regularly. It cost only \$1.00 for 52 weeks—one year.

Miss Nancy O'Neal, the Herald correspondent for South Side-Flat Top is spending the week with Miss Opal Stephens in the Dovie Community and her letter will not appear this week . . . but look out next week.

Government payments to Texas farmers amounted to \$68,814,000 in 1938, or almost double the \$36,010,000 paid in 1937.

An Appeal for Payment of More Delinquent Hamlin School Taxes

JONES COUNTY 4-H CLUB NEWS

The Jones County Boy's 4-H Club Livestock Show will be held at Stamford, Texas, on Feb. 25, 1939.

The program will begin at 10:00 A. M. at which time a parade will be staged. The 4-H Club Boy's will begin the judging by placing classes of breeding swine, after which official judging will be announced, and reasons for placing will be given in order that the public may get the educational benefits of the judging. Other phases of the show will be handled similarly. This show will consist of 16 Beef Calves, 40 Swine, 5 Registered Dairy Animals and some sheep. At the conclusion of the show there will be an auction for any of the animals that the boys care to sell.

The calves will be weighed in at the Stamford Mill & Elevator Company, and exhibited across the street from the Chamber of Commerce building.

Individual breeders in the County have indicated their interest to show some breeding stock, this will be welcome, however the prize money will be given only to the Jones County 4-H Club Boys.

There are 250 4-H Club Boys enrolled in the County, representing 23 communities.

The Herald Anywhere 1 Yr. \$1.00

The Hamlin School Board and its Superintendent deeply appreciate the payment, so far, of the 1938 school taxes and some delinquent taxes. However, much more local taxes are needed if future accounts are to be paid.

So far, only 66.8 per cent, or about two-thirds, of the 1938 Hamlin school taxes have been paid. Our local schools certainly need the balance due. In addition to this, as much as possible should be paid on school taxes long past due.

The Hamlin school superintendent, for the past several years, has assumed the arduous burden of collecting school taxes without receiving any remuneration whatever for such service. This is part of an extremely frugal course that has been pursued by the School Board and the Superintendent.

By very rigid economy and careful management so far, we have accomplished three very desirable aims, viz.: (1) We have always maintained a full nine months' term every year without private contributions. (2) Every local account, up to date, has been paid, even including the cost of building a school bus garage. (3) The Hamlin High School courses have been extended to include vocational agriculture, public school music, band music and additions to the commercial department. It was thought for a long time that we could not pay for these needed additional educational advantages but we have paid for them in the past and we are able to pay for them in the future.

Again, we are very appreciative of the financial support given so far. We are very solicitous, however, for more school taxes to be paid.

If it be possible, will you who still owe school taxes pay, even if you have to sacrifice to do so?

WE NEED MORE MONEY FOR OUR SCHOOLS.

Signed,
C. G. GREEN,
Superintendent Hamlin Schools.

YOU ARE INVITED TO M. E. CHURCH

Sunday school at 9:45, let each one be in his place on time.

Preaching at 11:00. Subject: "WHERE OUR GREATEST BATTLES ARE FOUGHT." The League meets at 6:45. Preaching at 7:30. Subject for the evening hour: "HOW TO BE PROSPEROUS."

Throughout this month we will give special emphasis on the Youth's Crusade. The young people will sponsor the music for these services. It means they will be responsible for it. They want each one who can sing to help them. Our work is making some progress. But we need more in our services. If you are not attending elsewhere, we urge you to worship with us. You will find a heart welcome. We welcome any suggestions on how we could make the services more helpful. Remember, you are always welcome at our church.

BISHOP HOLT COMING

On the night of February 21, Bishop Holt will preach at the Methodist church in Hamlin. Bishop Holt is not only a recognized leader in our denomination, but is regarded as one of the strong leaders of the forces of righteousness throughout the world. You will enjoy hearing this man of God. We extend a hearty invitation to everyone to attend this service. Remember the time is Feb. 21, the hour is 7:30.

Sincerely,
H. W. HANKS, Pastor.

BEEF FOR HOME USE

Farmers do not usually keep a cow on the farm just to raise a calf for the home beef supply. The cow on the farm in addition to raising a calf must furnish milk for the family. However, a good piece of beef can be produced from a Jersey, Holstein, or Guernsey steer, provided this steer calf or steer yearling is fat when he is butchered. One must not expect that a steer calf of this type will compare as a beef animal, or will be able to compete in beef production, with those of special beef breeds.

Too much emphasis cannot be placed on using ordinary feed produced on the average cotton farm, or other farms, for fattening the calves for home consumption or for market.

There is very little difference in the feeding value of the basic fattening grain feeds such as corn, wheat, barley, milo, kafir, feterita, and he-gari, when these feeds are used to fatten beef calves or other calves for beef. Oats are considered more of a growing feed and are excellent to use at the beginning of the feeding period or while the calf is still nursing. Brewer's rice, rice polish, or rice bran are better used in combination with other grains.

With the possible exception of whole cottonseed, protein supplements for balancing the grain ration must be purchased. Cottonseed meal or cottonseed cake is the standard protein supplement in Texas.

Sorghum roughages show very little difference in feeding value. The quality, maturity and method of feeding will determine their efficiency.

Johnson grass hay, sudan grass hay, and prairie hay, are excellent roughages. Hays made from the small grains, such as oats, wheat, and barley, when cut in the dough stage, are also excellent roughages. All these hays are classed as carbonaceous hays.

Silage is the easiest roughage to feed in all kinds of weather conditions. Its value depends on its quality, maturity and grain content.

In these rations the milo or other grain sorghums may be interchanged

with corn, wheat, barley, or rye on a pound for pound basis, but when small grains are used they must be ground. Pea size cake works to advantage when threshed oats, shelled corn, or other unground grain is fed, but cottonseed meal is preferred in rations using ground feeds. The amount of cottonseed meal or cake may be reduced when an abundance of green pasture is available, but when the pasture gets dry the amount must be increased.

In some instances the farmer does not have a calf of his own raising to feed for home consumption but has purchased a calf at weaning time and what he would like to know is how to feed that calf. The following method of feeding will furnish a balanced ration from the time the calf is started on feed and is thin to the time he is fattened. It is easy to do this.

A ration is made up of three things: (1) roughage (hay, hulls, corn fodder, etc.); (2) protein supplement (in Texas that means cottonseed meal or cottonseed cake); and (3) grain (milo, corn, barley, etc.).

From start to finish of feeding give the steer all the roughage he will eat. This does not require any figuring, simply give him what he will eat.

As for protein we will feed a definite amount and the same amount from beginning to the end of the fattening period. For weaned calves, regardless of weight, two pounds of cottonseed meal or cake per head daily is recommended. In a few days after the calf gets filled up on roughage we can be feeding the entire amount or allowance of cottonseed meal or cake. Get him to eating all of the cottonseed meal or cake allowance before feeding him any grain. With protein and roughage taken care of there is only one thing for the farmer to watch, that is, the amount of grain.

Begin feeding the calf ½ pound grain per day, adding each day ½ pound until the calf shows that he has a ration high enough in grain. All the farmer has to do is to watch the droppings—do not let them get

anywhere near scouring. In about ten days make another ½ pound per day increase until the calf again gives indication that the ration contains enough grain. Continue this method of making grain increases throughout the feeding period.

The amount of feed required to produce 100 pound gains on calves in dry lot will take about:

400 lbs. corn, milo, or other grain.

100 lbs. cottonseed meal.

400 lbs. roughage, such as sorghum, Johnson or sudan hay.

Therefore to put a 300 pound gain on a calf it will take three times the quantity given above.

Patty Andrews, of the Andrews Sisters, whose vocal work is a feature of the new Phil Baker show, is getting her first opportunity to show her wares as a comedienne on the accordionist-comedian's new series.

For best production, a milch cow needs an abundant supply of succulent roughage, such as green pasture or silage.

INZER'S

THE COST DRIVING ON TEXAS HIGHWAYS

Motor vehicle accidents snuffed out one human life every five and one-half hours on Texas highways, streets, and roads during 1938.

More than \$25,000,000.00 was the estimated economic loss in the state due to motor vehicle accidents in 1938.

These facts and figures were revealed today by Harry S. Phillips, Traffic and Safety Engineer of the State Highway Department, who declared that although there is more than a one per cent reduction in the daily average of fatalities and also a marked decrease in the number of motor accidents for a year's period, the number of traffic fatalities in Texas is still far too high.

He called attention to the 8.8 average daily death toll for the ten-day period December 23, 1938 to January 1, 1939, that included an all time high fatality mark of 25 deaths on December 24, when one person was killed every 57 and one-half minutes.

"The seventy-six fatal accidents on the streets and highway of Texas during the Christmas holiday," Mr. Phillips said, "took a toll of 88 lives, inflicted personal injury to 105, and resulted in an economic loss of approximately \$1,087,150.00."

According to statistics compiled by the traffic division, "the driver had been drinking" in twenty-one, or 27.6 per cent, of the 76 fatal accidents, and fourteen or 18.4 per cent, of the accidents were the result of vehicles traveling "too fast for conditions."

Bad weather was largely responsible for the great increase in accidents during the holiday season, Mr. Phillips explained.

"Sometime prior to the ten-day period in question, very little rainfall was recorded throughout the state, and a film of dust and oil had accumulated on pavement. Immediately preceding and throughout the holiday season, the entire state had almost constant rainfall that came in a slow drizzle. A hard rain would have washed the dust and oil from the road surface, but the slow drizzle created and prolonged a slippery film," the traffic and safety engineer pointed out.

Of the 1610 fatalities recorded

for the year, January 1 through December 31, 1938, 45.3 per cent were attributable to the primary causes, "driver had been drinking" and "driving too fast for conditions." Mechanical failure of vehicles resulted in 12.2 per cent of the fatal accidents, and responsibility rested on the pedestrian in 13.7 per cent, Mr. Phillips said.

Drivers were cautioned to refrain from drinking when operating a motor vehicle and to keep their vehicle under control at all times that an appreciable reduction in traffic accidents may be attained during 1939.

DON'T SLEEP WHEN

GAS PRESSES HEART

If you can't eat or sleep because gas bloats you up try Adlerika. One dose usually relieves stomach gas pressing on heart. Adlerika cleans out BOTH upper and lower bowels.

WAGGONER DRUG CO.
INZER PHARMACY

Cash income received by farmers of Texas during December totaled only \$22,932,000, exclusive of Federal subsidies, as compared with \$27,941,000 in December, 1937.

Baugh and O'Brien Don't Mind Explaining Technique of Passing

Girls at Texas State College for Women recently had a chance to learn plenty about the fine points of football passing when Davey O'Brien visited the campus to receive their annual trophy as Grid-iron Favorite of the Southwest Conference. Here is Miss Elizabeth Robertson, student president, taking a lesson from O'Brien and Slingin' Sammy Baugh, who was TSCW's 1936 favorite. The fact that the girls chose Sammy, who measures 6 feet 2 inches, and Little Davey, who tips the yardstick at 5 feet 7 inches, offers new evidence on the age-old question of woman's fickle tastes.

4-H Club Boys Grow Into Stock Farmers

JONES COUNTY:

Seventeen regular 4-H Club meetings have been held in the county with 200 boys attending. Parliamentary procedure, in the new clubs, hand books and dairy cattle judging were taught.

The Mares community 4-H Boys followed up this dairy cattle judging at an adult meeting of the Hodges community, the community which was selected by the agents to hold regular monthly meetings in. A class of dairy cows were judged by these boys, and reasons for classing were presented to a group of thirty men which attended a dehorning, castrating, and vaccination demonstration. Since some of the group of men had boys in this judging event they became so interested that they asked that dairy work be continued at our next monthly meeting.

FINE GILTS

Sixteen boys purchased the same number of registered Polan China gilts from Lon Alexander, swine breeder, of Childress. A boar for the gilts was arranged for. Some men were present at Anson when the boys drew numbers and selected their pigs. These pigs' weight varied from 75 to 120 pounds. Needless to say the largest pigs were selected first, however, it is believed the boy who drew last was fortunate.

Preceding the drawing instructions were given on selecting breeding pigs. Some of the boys were of the opinion that the gilts were too hump back and were skeptical in the end whether it would be advisable to take one of the well arch-backed gilts, and likely desired a straight back hog as they were accustomed to seeing.

The boys organized with a president, vice president and secretary. They worked out plans whereby the boy who would keep the boar was satisfied. They agreed to have call meetings for the members, which might be done at any time the members saw fit to do so.

Each boy and his father agreed to fence one-half acre so that pasture could be provided. Some of the boys have wheat which they are fencing now; others will wait until Sudan can be had.

The gilts will be shown at the calf show, February 25, 1939. They will not be in the desired shape but it will certainly be worth anybody's time to see them.

The 4-H beef calves are looking good. Geo. W. Barnes complimented the work done by the boys in their first year of feeding experience. The boys are giving lots of time to training and shaping their calves for show. Some of the calves will be taken to the Fort Worth Fat Stock Show.

The Dairy Club members met and discussed buildings a bull pen. Mr. E. R. Eudaly furnished plans for a safety bull pen. Feeding, care and management of the heifers were discussed. The heifers have been vaccinated for hemorrhagic septicemia. Three other boys are interested in purchasing registered heifers.

TERRACING SCHOOLS

Seven terracing schools were held in various parts of the county, and 122 attended these schools, and twenty farm levees were adjusted. The agent scheduled a series of terracing schools due to the fact that requests for terrace lines were far more than it was possible to get to, since the terracing season is so short. Circular letters were sent out urging each one to attend one of these schools, that were interested in having lines run, and to have two men attend these schools, one of which was given instructions on carrying the target, and the other on operating the level apparatus. The men who attended were well pleased and it is believed that many more lines can and will be run because of these schools. A new farm level has been bought by Joe V. Grimes, commissioner for his precinct. Four-H Club boys are being given lessons in running lines and communities are being encouraged to buy a level.

BETTER COTTON SEED

A one variety Cannon community was organized and orders have been placed for about 500 bushels of Acala cottonseed.

A variety test will be conducted in the county cooperating with Mr. Killough, of the Experiment Station. Thirteen different varieties will be planted in this test with six rows

in each variety according to Mr. Killough, agronomist.

A number of flocks of poultry have been treated for diseases and parasites. Culling, delousing and vaccination have been the biggest problems. Blue prints on poultry equipment have been in demand.

The Jones County game preserve demonstration now has 87,279.18 acres signed up, with 111 members. Anyone desiring membership in the Jones County Game Preserve demonstration, may obtain information on this subject from the county agent's office.

PETER HEALS A LAME MAN

LESSON TEXT—Acts 3:1-10; 4:8-12.
GOLDEN TEXT—Then Peter said, Silver and gold have I none; but such as I have give I to thee.—Acts 3:6.

Is Christianity on trial? Answers would differ, depending on varying points of view. Assuredly Christ is not on trial. He is the Son of God and the only Saviour of men, and we are "on trial" as to our attitude toward Him. It is also certain that the true Christian faith is not on trial. Even the liberal and so-called modernistic leaders confess that it is the only faith that has proved itself in the crucible of daily experience.

There is a sense, however, in which Christianity as a whole is on trial. The Church which professes to represent Christ on earth has failed most miserably at so many points that the world is looking at it with the same cold suspicion with which the Church was viewed in the time of Peter. The question which one can feel on every hand even though it is not asked in words, is, "What have you that will meet the unprecedented need of the individual—the social order—the whole of humanity?" There is a sufficient and a satisfying answer, but it is not found so much in the temporal realm as in the spiritual. We have something to offer that is better than silver or gold—the salvation which is found in none other than Jesus Christ, our Lord.

I. Better Than Silver and Gold (3: 1-8).

The lame man had long since abandoned hope of anything more than the coins that he could beg as he sat at the temple gate. He is typical of our hardened and cynical age which is interested only in what it can get in cash, and in what that money will buy. Even Christian people seem to have forgotten that "a man's life consisteth not in the abundance of the things which he possesseth" (Luke 12:15).

God has for us things far better than silver and gold—deliverance from the power and penalty of sin, glad liberation from the limitations of spirit which hold us down and make us content with the paltry alms of men. Where are these things to be found? In Christ. How are they ministered? Through His faithful servants. Peter and John were the kind of men who, though busy, had time to pray (v. 1). If you know men or women like that, cultivate their friendship, look intently to them in faith (vv. 4, 5), receive their help (v. 7), and above all, believe in their Christ (v. 6), and you will receive that which is better than silver and gold.

God healed this man's body, but what is more important, He healed his spirit (v. 8). We need that kind of healing for the spiritual cripples of our day. The weak-kneed, lame-ankled, and spirit-darkened individuals in our churches and communities need the touch of God. Perhaps you may be used to bring them His message of deliverance and power.

II. Wonder and Amazement (3: 9, 10).

It has been suggested that one of the weak points in the ministry of the modern church is the lack of such miraculous deliverances from sin as those which caused the unbelievers of a generation or two ago to look with wonder on the ministry of the Word. After all there is no testimony just like that of a redeemed and transformed life. Men may argue with our philosophy, question our theology, but a redeemed life is a walking testimony in a community that no scoffers can refute.

There are two reactions recorded in the context of our lesson which reveal the possible attitudes of men toward such experiences. Some were amazed and believed in Christ. (4:4). Others hated the cause of Christ (4:16, 17) and they cast the preachers into prison (4:1-3). Did

CLOVER FARM STORES

this discourage them? No, indeed. They knew that they owed allegiance to God rather than man (4:19, 20), and consequently used their very trial as an opportunity to proclaim

III. The Pre-eminent Saviour (4: 8-12).

Note here again that the speaker was a Spirit-filled man. That is the absolute prerequisite to effective proclamation of the truth. Observe also the care with which Peter makes known that he and John are to have no personal credit or glory. They "have something there" that might well be applied to present-day religious activity when many men must either have all the glory, or go off and start a new work where they can have it.

Let us make much of the clear teaching concerning the person and work of Christ which is found in these verses, particularly stressing His place of absolute pre-eminence as the one and only, and, at the same time, the all-sufficient Saviour of mankind. Let us not forget that "there is none other name whereby we must be saved" (v. 12).

J. B. BOWMAN'S SHOE SHOP

Better Lights For West Texas Farm Homes

One of the prosperous farmers in the Hamlin territory was in the Herald office the other day and was telling about the better lighting he now has in his home.

Also the other day another farmer was observed in a grocery store with three lamp chimneys for his oil lamp in his farm home. He said that had been the kind of light he had lived by all his life.

Most men and women of this age were "brought up" in the shadows of an oil lamp... most of us understand what it is to sit by a partially smoked lamp chimney and try to read but maybe dim lights in the young days of the older people helped to keep them from roaming the country for a hundred miles about from dark to midnight or maybe later.

This is a day of the Windcharger, a peculiar wind machine that provides most of the light luxuries in the rural home that can be had in the city where the electric power lines do all kinds of household work.

A new day for the rural home is also at hand for the rural home and premises. It is the Rural Electrical Administration, a government loan-

ing feature that is helping bring high power electric lines into thickly settled communities. The Administration has already made allotments amounting to \$187,974,030 since it was established in 1935. This year the Administration has already allotted \$98,869,720 for rural electric lines. The latest and nearest project is in Floyd County. The Floyd County Rural Electric Cooperative, Inc., has been allotted \$194,000 to build 197 miles of line to serve 386 members in Floyd, Hale and Briscoe Counties.

Perhaps there has been nothing that held back comfort in the farming sections more than the lack of running water and electric lights and power. The farmer mentioned above was elated that he could sit anywhere in his room and read his paper. His light comes from the Windcharger. Another farmer says he has lights all about his home, yard, lot and barn from his wind machine. And who says science and inventions don't help everybody. Let the wind do the water pumping, and generate the electric power.

PHILATHEA CLASS HAVE PARTY

Using a Valentine theme, Miss Virginia Sue Flowers entertained the Philathea Class of the First Baptist Church, Tuesday evening, February 7, in her home. During the evening those present played games centered around the holiday motif.

Refreshments of tuna sandwiches, in heart shape, olives, potato chips, chocolate brownies and an iced beverage accompanied by an amusing plate favor, were served to Misses Elva Greenway, teacher; Juanita Harbert, Kathlene Elliott, Mary Stovall, Dorothy Hines, Betty Myrtle Routh, Ruth Eckler, Inez Howard and the hostess.

Milch cows will do better if they have plenty of salt and calcium. A mixture of two pounds of pulverized limestone or oyster shell flour and a pound of salt, placed in the pasture where cows can lick it when they desire, will bring results.

Early Candidate Announces Campaign Slogan, 'A Cow for Every Bull and a Man for Every Job'

AMARILLO, Feb. 1.—Gene Howe, newspaper publisher who is a candidate for a congressional job that is already filled, announced his campaign slogan today:

"A cow for every bull and a man for every job."

Howe's candidacy is based on the supposition that Rep. Marvin, Jones, D., Tex., chairman of the house ag-

ricultural committee will be appointed by President Roosevelt as a federal judge.

The candidate, who admits that he can't make a speech, promised his prospective constituents that his campaign would be conducted with music.

"There'll be no speeches," he announced through his column in the Amarillo Globe, "but there'll be plenty of singing over the radio. I can't speak but I believe people prefer poor singing to poor speaking."

His campaign song will be "Tumbling Tumble Weeds" and the master of ceremonies on his program will be an entertainer known as "Stuttering Sam."

Mr. Lacellas Threadgill, son of Mr. and Mrs. P. F. Threadgill of Hamlin, and a senior in Trinity University, Waxahachie, Texas, has been cast in the leading male role of "Seventh Heaven," one of the outstanding screen plays, to be presented by the Trinity cast of Alpha Psi Omega February 24.

Mr. Threadgill is Editor of the 1939 "Mirage," student yearbook. He is a member of the Blue Key Honor Fraternity, Alpha Psi Omega dramatic fraternity and business manager of Trinity Player's Club. He will graduate from Trinity in June with a B. A. degree.

Wheat and cottonseed rank first and second in value and importance as sources of by-products used in livestock feeding. Both wheat and cottonseed are leading Southern crops, and the availability of the feed products from these two crops is an important aid in the efficient and economical feeding of livestock in the cotton-growing states.

If you missed your Herald last week, perhaps it was not our fault. Did you tell us to move up your subscription so it would say 1939?

HAMLIN, 55 Years In Jones County TEXAS

LEONORA CORONA

DENTON, Texas—Glamorous Leonora Corona, whose face and figure are one pleasant bit of testimony that an opera star may photograph well and still reach the top in the musical world, will come to Texas this week for final rehearsals of Julia Smith's opera, "Cynthia Parker," in which she sings the title role for its premiere performance on February 16-17 at the North Texas State Teachers College in Denton.

Five-year-old Cynthia Ann Parker III, the great-great-granddaughter of the heroine of Julia Smith's opera, "Cynthia Parker," is expected to be among the guests of the college who will be honored at the opening night performance of the opera at the North Texas State Teachers College main auditorium February 16.

The little girl is the daughter of Roy Parker and the grand-daughter of Chief Baldwin Parker, Comanche Indian of Cache, Oklahoma, who will bring six members of his family to witness the premiere of an opera based on the life of Chief Parker's grandmother, the real Cynthia Ann Parker, who was held prisoner by the Comanches some 24 years prior to the outbreak of the Civil War.

The group will be among guests presented formally by Dr. W. J. McConnell, president of the College, at the opening performance. A 55-minute broadcast which will include 45 minutes of the opera itself has been arranged over the Texas State network.

The Cache Indians will present a

program in Denton on the afternoon before the opera opening. They will tell the Indian side of the Cynthia Ann Parker story and give a group of Indian dances, games and songs. Chief Baldwin Parker's family is among a number of Parker descendants that the teachers college has invited as special guests for the opera premiere.

Arrangements for the placing of an exhibit of photographs of Fort Parker and souvenirs of the fort in the lobby the night of the performance have been made by the college through the cooperation of the Groesbeck Chamber of Commerce. The keeper of the fort, Mrs. C. E. Tobias, will be among those presented on the night of the opera.

CARLTON COMMUNITY MEETING

The Carlton community meeting was held Friday night, Jan. 27, in the school building. Officers of this organization are as follows:

President, Mrs. J. E. Johnson; Vice President, Mr. W. G. Kelley; Secretary-Treasurer, Mrs. W. M. Chambers; Reporter, Mrs. E. W. Massey; Social Chairman, Louise Holden; Publicity Chairman, Mr. M. E. Carlton; Refreshments Committee, Mrs. E. W. Massey and Mrs. Ruby Jenkins.

The meeting was opened with a song led by E. W. Massey, accompanied at the piano by Mrs. Massey. After the business meeting the group was entertained with literary and track events. Following this all enjoyed a candy breaking.

Good times were reported. —Reporter.

Corn is only 49 per cent of the parity price for the five year period, 1909-1914; wheat 47 per cent, and peanuts 55 per cent. The livestock industries have fared better. Beef cattle prices are 96 per cent of the 1909-14 average; hogs, 80 per cent; butter fat, 71 per cent; wool, 88 per cent; chickens, 93 per cent, and eggs, 75 per cent.

Raising of livestock or turning the farm into an industrial plant seem to be the alternatives facing Texas farmers.

Still Coughing?

No matter how many medicines you have tried for your common cough, chest cold, or bronchial irritation, you may get relief now with Creomulsion. Serious trouble may be brewing and you cannot afford to take a chance with any remedy less potent than Creomulsion, which goes right to the seat of the trouble and aids nature to soothe and heal the inflamed mucous membranes and to loosen and expel germ-laden phlegm. Even if other remedies have failed, don't be discouraged, try Creomulsion. Your druggist is authorized to refund your money if you are not thoroughly satisfied with the benefits obtained. Creomulsion is one word, ask for it plainly, see that the name on the bottle is Creomulsion, and you'll get the genuine product and the relief you want. (Adv.)

A typical Southern dairy ration using wheat bran is the following, to be fed with medium protein roughages: Wheat bran 200 pounds, corn meal, hominy feed, ground barley or grain sorghums (threshed) 400 pounds; cottonseed meal 300 pounds; ground oats 100 pounds; and 10 pounds each of salt, and ground limestone, oyster shell flour or bone meal.

WHITE'S CREAM VERMIFUGE

For expelling Round Worms and for reducing Pin Worm infestation in children. Price 35c

Cottonseed meal, rich in the protein that is needed to balance wheat feed products in livestock feeding, is an excellent supplement that is widely used in rations containing wheat bran, shorts and similar feeds.

Hobbs Nudges Hamlin To The Tune of 28 To 20

The Tall boys from New Mexico were given a scare by the Pied Pipers. The game was not won until the final whistle. Hamlin led the Hobbs crew most of the time, but the Big boy, named Crow was determined the Hamlin boys would not get more than one shot at the Basket. This big, 6' 7" boy got most of the balls off of the Pipers goal if they missed a shot.

The game started out in great style—both teams were playing good offensive and defensive ball. The farther the game went the more exciting it became. There were 12 fouls called on Hobbs, against 9 for Hamlin. Both teams were showing considerable fight and naturally there were numerous fouls.

The Hobbs boys showed signs of being a good ball club again this year as they had previously beaten "the Abilene High School" last year state runner ups, 26-24. On the following night they beat Azyle, a strong team, near Fort Worth, 33-22. So after all Hamlin must have a fair team.

The largest crowd of the season turned out to see the ball game and there was plenty support for the Pipers.

Next in line for the Hamlin boys will be Sweetwater, a team Hamlin nosed out 19-17 in an extra period game in Sweetwater. The game will be here Friday, Feb. 10th.

Gerald Ivy lead Hamlin scores with eleven points while Kendrick lead the visitors with 10. The entire Hamlin ball team looked better in this game than they have at anytime this season. This means they hustled, handled the ball and played better defensive ball than before. They have looked better on hitting the basket, but I think the Hobbs defense had something to do with this part of the game.

So far this season the Pied Pipers have played 26 games, losing 4, one to Abilene, Hobbs, Lamesa and Goree. In county play they have not lost a game yet, they have to play:—Stamford, Lueders and An-

son to complete the county schedule. Then, if successful, they will play in the District Meet at Big Spring, the 17-18 of February.

TEXAS TECH TEAM PLACES

FOURTH IN COLLEGIATE

LIVESTOCK JUDGING

LUBBOCK, Tex., Feb. 3.—Collegiate livestock judges from Texas Technological College placed fourth among ten competing teams at the National Western Livestock show in Denver last week. The team scored second in cattle and fourth in horses. Individual team members also won second and sixth places among fifty contesting students.

Colorado State's team, coached by Ronald C. Tom, Tech graduate, won first place in the contest. Other standings were: South Dakota, Oklahoma A. & M., Tech, Wyoming University, Kansas State, Panhandle (Okla.) A. & M., North Dakota State, Utah State, and New Mexico A. & M.

Jack Hancock of Tahoka was second ranking individual, and Lucien Thomas of Fluvanna ranked sixth. Other team members are Mell Cherry of Lorenzo, Walter Henderson of Floydada, Harlan J. Willis of Eola, and John Wright of Breckenridge.

Adding machine rolls 15c or two for 25c at the Herald Office.

When on pasture, a 500 gallon milch cow should have around five pounds of grain mixture a day.

I Give You TEXAS

(By BOYCE HOUSE)

Many tears have been shed, figuratively speaking, about "of all sad words of tongue or pen, the saddest are these, It might have been." But Grantland Rice, the sports-poet, has a new slant:

Here's to 'the days that might have been';

Here's to 'the life I might have led';

The fame I might have gathered in—

The glory ways I might have sped.

Great 'Might Have Been', I drink to you

Upon a throne where thousands hail—

And then—there looms another view—

I also 'might have been' in jail.

NEW UNDER THE SUN

"There's nothing new under the sun," the philosopher of old declared. But Jerry Sadler, member of the State Railroad Commission since Jan. 1, has proved that there is. He made history when, 10 days ago, he held an oil hearing in an oil field. The hearing, concerning the new Avoca townsite field in Jones county, began in Austin. "Where are the landowners who own the royalty?" Sadler inquired. "Many of them couldn't spare the money to come all the way to Austin," someone explained. "Then we'll take the hearing to them," the Railroad Commissioner declared.

And so the hearing was conducted in the Avoca schoolhouse. Two hundred and fifty persons—cowboy boots and ten-gallon hats, calico dresses and overalls much in evidence—attended. Many owned only one or two lots in the townsite. Everybody was extended a chance to give his views and as much time as he

wanted in order that the wishes of plain citizens as well as experts and oil companies could be heard. And everybody seemed to like Sadler's idea of taking the government to the people.

Probably you've seen that sketch entitled 'Isms' that Mr. Anonymous wrote:

"SOCIALISM—If you own two cows, you give one to your neighbor.

COMMUNISM—You give both cows to the government and the government gives you back some of the milk.

FASCISM—You keep both cows but give the milk to the government, which sells some of the milk back to you.

NEW DEALISM—You shoot one cow, milk the other and then pour the milk down the sink."

To have a continuous supply of milk, the average farm family of five should have two cows, each capable of giving 500 gallon of milk in a 10-month period. One cow should freshen in the spring and one in the fall.

Mr. and Mrs. Frank Waggoner and son, Jerry visited Mrs. Waggoner's brother, Billy Fomby and sister, Miss Grace Fomby in Kermit, Sunday.

WASHINGTON NEWS

FROM CONGRESSMAN
CLYDE L. GARRETT

NEW BILLS—Some of the bills recently introduced are: Extension of stabilization fund and of President's power to revalue the dollar, introduced in the House by Rep. Somers of N. Y.; Senator Walsh introduced the amendments to Walsh-Healey Public Contracts Act; Senator Russell of Georgia wants a standardization of U. S. contribution under Social Security Act for old-age assistance.

NAVY BASES—The Vinson Bill to construct 12 submarine and air bases at a cost of \$65,000,000 with \$5,000,000 for defense improvements at Guam, held the center of interest and attention. The \$5,000,000 would only make minor improvements at Guam, but according to Admiral Hepburn an air base and submarine base fully equipped, would be justified for the defense standpoint alone. Such a base would cost \$80,000,000. The other air base locations mentioned in the Vinson Bill were not given much attention. The little island of Guam held the interest.

FASCISM IN LATIN AMERICA—

The victory fascism won in Spain, the mother country of most of Latin America, has increased the fears that have long been felt by the American Department of State, that fascism will penetrate Latin America. This is being felt more and more

when one realizes that a large market for raw materials of Latin American nations is being offered by fascist nations and that the U. S., too abundantly supplied, cannot buy much from them.

TENANTS BECOME OWNERS—

Although the new crop insurance program for wheat is primarily intended to give farmers "all-risk" protection on their growing crop, it may aid tenants to become landowners. Some landowners such as banks and life insurance companies are finding it feasible to sell their lands, under a fixed commodity contract, to tenants and others with a small amount of capital. Under this arrangement, land payments are to be made in the form of a share of the wheat crop. Annual payments of wheat to the seller are then covered by a wheat crop insurance policy, which guarantees both parties to the contract that crop failure or loss will not jeopardize the payments.

NAZI RUBBER DEVELOPMENT—

It is reported in Nazi sources that a high official of one Central American government is on his way to Germany to negotiate a land sale for development of rubber in his country by the Germans.

PRICE OF DEFENSE—Prices in general have risen since the Americans were last involved in war, but the price of defense has shown a sharp increase. Defense costs have risen to 400 per cent, while living costs have risen only 25 per cent. One reason for this sharp rise is that weapons for war-fare have become more complicated and more costly. One example of this is shown in the cost of a battleship.

In Wilson's time the cost of building a battleship was thirteen million dollars, now its 70 to 75 million dollars. A typical aircraft carrier today costs nearly double what it

cost five years ago.

SECURITIES—The factors determining the flow of capital investment has always been of interest to anyone interested in economic problems. Financial circles were specially interested, therefore, when the Security and Exchange Commission announced that it would inquire into the problem of private sale of securities, as part of its investigation for the Temporary National Economic Committee. A loophole was left open, in the Securities Act of 1933, that allowed corporations to sell their securities to small groups of investors without complying with the registration rules of the Act. This was said to be done in order to let small business men avoid the cost of preparing registration statements.

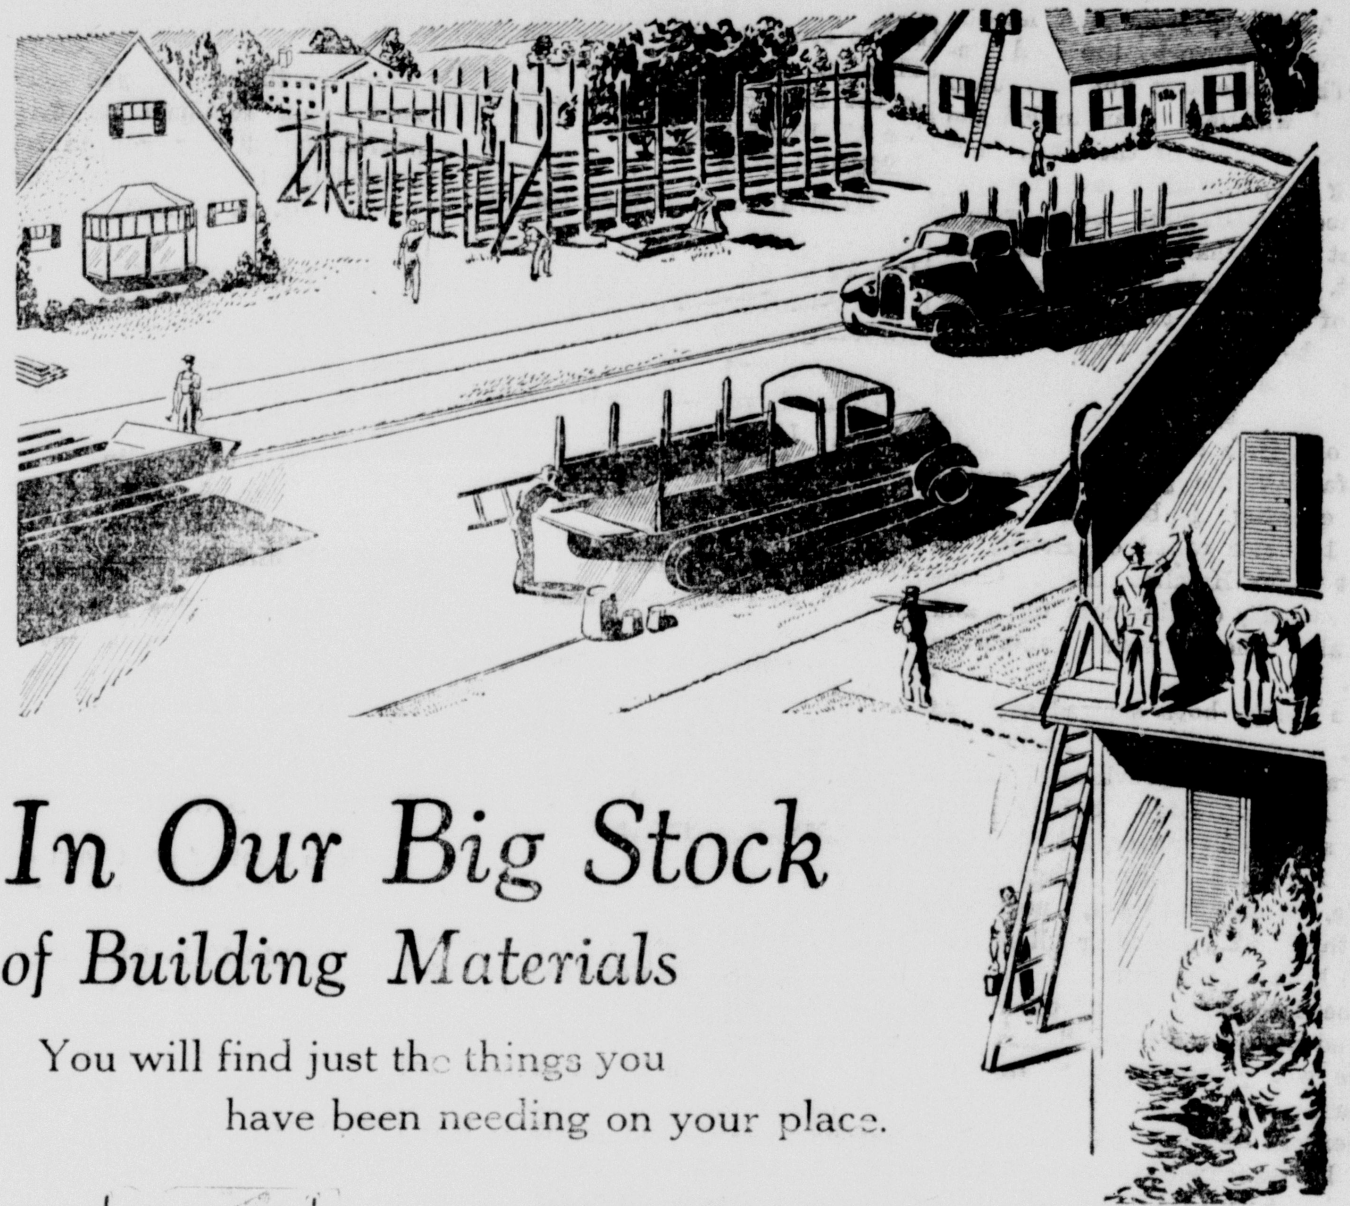

How's this for brainpower! Catherine McCune, who plays "Clara Potts" in the CBS serial, "Scattergood Baines," had her high school diploma at the age of 14.

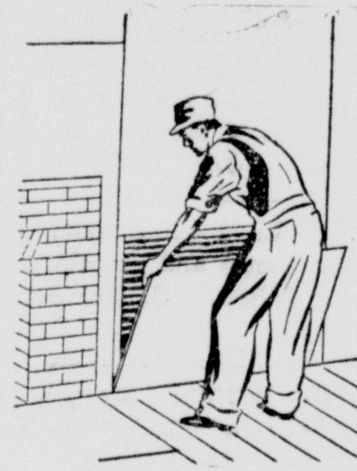

If you missed your Herald last week, perhaps it was not our fault. Did you tell us to move up your subscription so it would say 1939?

Government payments to Texas farmers amounted to \$68,814,000 in 1938, or almost double the \$36,010,000 paid in 1937.

IT'S A HIT! The NEW
Firestone
CHAMPION TIRE

Because IT'S THE ONLY TIRE MADE WITH THE NEW
SAFETY-LOCK CORD BODY
and GEAR-GRIP TREAD

CAR OWNERS everywhere are claiming the extra blowout protection and non-skid safety of the new Firestone Champion Tire. And automobile manufacturers, knowing its outstanding performance, have adopted it for their 1939 models. On every hand you hear, "It's the most effective tire we have ever had on wet pavement and in mud and snow!" It's the hit of 1939!

The Firestone Champion Tire is a completely new achievement in safety engineering and the result of a new and revolutionary means of locking greater safety into the cord body of a tire. This is accomplished first by the use of a new type of tire cord called "Safety-Lock," in which the cotton fibers are more compactly interwoven to give greater strength. And then the fibers in each individual cord, the cords in each ply and the plies themselves are all securely locked together by a new and advanced Firestone process of Gum-Dipping, which provides amazingly greater strength—and greater strength means greater safety.

The new Safety-Lock cord construction gives the added strength that makes possible the use of the new thicker, tougher, deeper Firestone Gear-Grip tread, which provides remarkably longer non-skid mileage. This sensational new

AB JENKINS
World's Safest Driver

Ab Jenkins, holder of 87 world records for safety, speed and endurance, who has driven more than a million and a half miles on Firestone Gum-Dipped Tires without an accident, says, "On the speedway or on the highway, I insist upon the extra safety of Firestone Gum-Dipped Tires on my cars."

tread is called "Gear-Grip" because of its unique design which has more than three thousand sharp-edged angles that grip the road with a sure-footed hold to protect against skidding and to assure a safe stop.

Come in today and equip your car with a set of new Firestone Champion Tires, the only tires made that are safety-proved on the speedway for your protection on the highway.

Hudson Service Station

HAMLIN, TEXAS

SIDELIGHTS / INDUSTRY

NEWS—

A method of locating oil directly through soil analysis is in the experimental stage. If soil analysis works out, it will streamline present methods of oil prospecting, cut the cost of locating oil, and reduce the number of "dry holes" drilled.

At present two methods are being developed. One is to test the surface soil for paraffin. The other is to test the earth several feet below the surface for the presence of ethane gas, on the theory that if oil is underground, the seepage of ethane gas accompanying the crude oil will, over a period of years rise to the surface.

FRUIT—

Laboratory technicians are finding new and amazing uses for petroleum hydrocarbons, the chemical building blocks from which petroleum is made. Butylene, a gas formed in cracking, is a boon in cooler climates where difficulty is experienced in bringing crops to maturity. It speeds up the ripening of the fruits on the trees, where ripening has been retarded by weather or other conditions.

Experiments disclose the possibility of cutting ripening time as much as 50 per cent on such trees as apple, prune, cherries, and walnuts. Butylene also has been used to speed the ripening of dormant or slowly ripening potatoes.

CLEANED UP—

Two-spot troubles of dry cleaners are over! For many years solvents in common use were suitable only for removing greasy spots, yet, frequently, non-oily substances made spots on clothes.

If water were used sparingly, these spots could be removed from heavy clothes; but not from light Sunday-go-to meeting dresses. But new cleaning agents developed from petroleum sources now remove both water-soluble spots and stains on delicate fabrics.

HOT STUFF—

Modern industrial processes re-

quire an even controlled heat, and the fiery but amenable "buts" in fuel oil meet the need.

Bread manufacturers, for instance, do their baking in a big way with direct and indirect ovens. Fuel oil supplies the flexibility and control which is essential.

Many cement kilns now are fired with oil, particularly those producing white cements. Proper control of temperature is essential to the right color. For the same reason glass-manufacturers favor fuel oil, which neither discolors nor injures the product.

In the manufacture of automobile engine bearings, oil heat finds unusual application. Ordinarily bearings are made of an alloy of three metals, with durability depending to a great extent upon the crystalline structure.

Temperature of the molten metals before they are mixed influences the crystalline structure of the resultant alloy. Accordingly oil heat maintains each of the metals at constant, specified temperatures as it goes to meet and alloy with the others.

THE WOMAN'S LITERARY CLUB

The Woman's Literary Club met Friday afternoon in the home of Mrs. Frank Johnson on Union Avenue.

In a business session reports of officers and committees were heard and plans were announced for The Hobby Show which will be held Saturday, February 11, in the building formerly occupied by the Home Lumber Company.

The program, "A Look Ahead," was directed by Mrs. W. A. Albritton who also gave an interesting descriptive talk on the Philippine Islands. This was followed by a paper, "The Philippines Today and Tomorrow," read by Mrs. Bruce Henry. Mrs. Bowen Pope gave excerpts from Dorothy Thompson's Political Guide and Mrs. Heflin Miller in a most entertaining way gave a review of "After 1903—What?" by Robert Benchley.

CELEBRATES FIFTH BIRTHDAY

James Riley Tipton celebrated his fifth birthday, Thursday afternoon, February 2, at his home with a party from 3:30 to 5:00 o'clock.

Little Miss Faith Simpson sang "Happy Birthday To You," and was joined by the other little guests in singing this happy greeting.

At the conclusion of the play hour, Mrs. Tipton assisted by Mrs. Neidecken served cake, hot chocolate and candy.

Those present were Peggy Sue Barton, Almeta Neidecken, Ben Wesley Neidecken, W. C. Moore, Wilma Lee Moore, Neva Sue Burton, Jo Ann Johnson, Loupie Cave, Eugene Millner, Margaret Faye Patterson, Patsy Ann York, Barbara Ann Tipton; Mmes Shelburne, Patterson, Neidecken, Simpson and Routh.

MRS. JOHN ED DAY

ENTERTAINS WITH LUNCHEON

Mrs. John Ed Day was hostess for a lovely three course luncheon, Saturday at one o'clock, entertaining in her apartment on Central Avenue.

Spring flowers decorated rooms

where places were marked for guests at three beautifully appointed tables.

Games of bridge were played during the afternoon.

Those present were Mmes. Tom Williams, B. M. Brundage, R. H. McCurdy, Henry Albritton, C. C. Prater, M. T. Woodward, Weldon Griggs, G. H. Tumlin, Elmer Feagan, Holly Toler and Bob Low.

MARRIED IN DALLAS

Key S. Caldwell, of Hamlin, and Miss Josephine Bell, of Bowie, were united in marriage, February 2, 1939 in Dallas. The ceremony was read by Rev. Earl Anderson, Thursday evening at 7:15 o'clock in the home of the grooms mother, Mrs. Lula Caldwell, 4203 Junius Street, Dallas Texas.

The bride is the daughter of Mr. and Mrs. J. S. Bell, of Bowie. For her wedding she wore a becoming dress of teal blue with navy accessories.

Mr. and Mrs. Caldwell have returned to their farm near Hamlin where they are making their home.

MRS. McBRIDE HOSTESS

TO CLUB

A Valentine motif was used in decorations and appointments Tuesday afternoon in the home of Mrs. L. H. McBride when she was hostess to the Trece Senoras Club.

Four games of bridge were played with Mrs. Otis Hopper making high score for the club and Mrs. R. E. Johnson scoring high for guests.

At the refreshment hour a delicious salad plate with coffee was passed to Mmes. Wilson Norman, W. E. Akers, Vera Nobles, C. C. Reed, Bruce Henry, Clinton Barrow, M. T. Hudson, Otis Hopper, Willard Ma-berry, Butcher, R. E. Johnson and J. P. Morgan.

MRS. TOM WILLIAMS HOSTESS

Mrs. Tom Williams was hostess to two club groups this week, entertaining the Colonial club Tuesday afternoon and the Merry Matrons, Wednesday afternoon in her home

on Jackson Avenue.

White vases filled with red Bougainvillea and red sweet peas gave the floral decoration to rooms where a Valentine motif was used in game appointments.

An attractive refreshment plate holding chicken salad, cheese straws, peach pickle, sand tarts and coffee was served.

In the bridge games Tuesday, Mrs. Alford Harden made high score. Others playing were Mmes. B. M. Brundage, Elmer Feagan, Paul Fowler, Bob Low, Frank Waggoner, J. E. Moody and Holly Toler.

Those attending the Merry Matrons club, Wednesday were Mmes. John Ed Day, J. W. Ezell, J. B. Eakin, R. H. McCurdy, Garland Tumlin, J. L. Keen and R. E. Johnson.

HAMLIN TEACHER MARRIES

LUBBOCK GIRL

J. Melvin Grigg, commercial teacher in the Hamlin High School, surprised his friends when he returned from Lubbock, Sunday, accompanied by his bride, the former Miss Geraldine Fox of Lubbock.

The wedding took place Saturday evening at six o'clock in the Broadway Church of Christ in Lubbock with Dr. G. C. Brewer reading the ceremony.

The bride was attended by her sister, Miss Sara Beth Fox, as maid of honor. Bridesmaids were Misses Mary Jane Johnson, of Amarillo, Elizabeth Niblack, Opal Grigg and Lalla Ruth Adams, of Lubbock.

Gus Niblack, of Childress was best man and other attendants were Talbert Bennett, C. L. Storrs, Jack Niblack, all of Lubbock and Frank Bundy, of Post. Garrett Fox acted as candle lighter. Nuptial music was given by Miss Luella Knox and Mrs. Ruth Havens, and a recessional was given by a group of Camp Fire girls, of which the bride had been a former leader.

Mrs. Grigg is a daughter of Mr. and Mrs. D. P. Fox of Lubbock. She attended Texas Tech and was employed in the traffic department of the South Western Bell Telephone Company.

Mr. Grigg is a graduate of Texas Tech and has been teaching this year in the Hamlin High School.

Donald Dickson got the call as the featured soloist of the Sunday night Pagan-McCarthy-Ameche stanza during Nelson Eddy's spring and summer absence from the show. Dickson, a baritone, is one of the younger members of the Metropolitan Opera Company and one of its most promising stars.

PENSIONS BY DEFICITS

(Star-Telegram)

The House of Representatives has authorized the old age pension administration to borrow an additional \$900,000 for paying the State's portion of allotments to the elderly, and if the Senate approves the proposal as is predicted, the State will have piled up a total of \$2,200,000 in deficit financing of pensions.

Thus, the State continues a policy of paying for a social reform by borrowing, which adds the item of interest to the cost of paying the pensions. Such a method is permissible only on the ground of emergency, which has been stated to be the reason for the House authorizing the second debt-making proposal. The immediate emergency would be defined as the need of the old folks for pensions, but at the same time the eleventh hour borrowing is the result of neglect by a previous Legislature to provide taxes for financing the pensions. Logically, the State should also borrow to provide funds for the teacher retirement plan.

It will be possible for the State to pile up a huge debt in financing pensions, if the Legislature permits further "emergencies" like the cur-

rent one. There is a distinction to be drawn between the state pension situation and the depression emergency, which has forced the Federal Government to pile up a larger national debt, although some persons may feel that the length of the depression should have been foreseen at the outset. The old-age pension movement in Texas is no overnight visitor.

A state pension debt of \$2,200,000 is not a huge amount, but it is a start in the wrong direction, after the Legislature has twice been caught by surprise with the same "emergency."

Mr. and Mrs. Frank Lawlis were called to Waco, Tuesday of last week because of the death of her grandmother, Mrs. N. R. Barnes.

The taxation shoe is pinching the feet of the members of the Texas Shoe Retailers Association who at a recent convention asserted that taxes now take a toll "of more than 25 per cent of our gross income" and are "the largest item entering into the cost of operating business." Vigorous opposition to "further increase in taxation of any kind or nature or the levying of any new tax" was expressed.

Entry in "oldest joke" contest: A white man presented a negro with a bottle of whiskey and, a few days later, he asked how the whiskey was. "Just right, boss," the darkey replied.

"What do you men—just right?" the white man asked.

"If it had been any better, you'd a-kept it yourself and ef it had been any worse, I couldn't have drunk it."

Then there was the man who said, "I wasn't acquainted with the deceased but I'll go to the cemetery for the sake of the ride."

A good grain mixture for a milch cow is four pounds of ground corn, maize, barley or other grain and one pound of cottonseed meal, according to E. R. Eudaly, dairyman of the Texas A. & M. College Extension Service.

A good shade in the summer and a shelter in shed in the winter help a milch cow pay dividends.

WAGGONER DRUG CO.

"The Fussy Pill Rollers"

Keeping the Family Cow On the Job

The average farm family of five should have two cows that will each give at least 500 gallons of milk in ten months. One cow should freshen in the spring and one in the fall.

A milch cow needs an abundant supply of succulent roughage at all times, such as green pasture or silage. To supply this roughage there should be one acre of sudan grass for each cow for late spring, summer and early fall grazing. For the late fall, winter and early spring grazing, each cow should be supplied with one acre of oats, barley or wheat pasture.

There will be times when the pasture will fail due to drouth or cold weather. Ample supply of silage should be stored to take the place of pasture when the pasture fails. Each cow will need an average of three tons of silage per year. For insurance there should be stored at least six tons of silage every year for each cow, to take care of those years when no feed is made. About one acre of hegari or some similar crop will be required to produce six tons of silage.

On good land some years one acre of grass will supply more grazing than one cow can consume. This surplus sudan grass can be put in the silo. In this case less hegari will be required.

A silo for one cow should be two feet wide and two feet deep, and sixty feet long to hold three tons. If six tons is to be buried make two silos of the above dimensions. A trench silo for two cows might be made three feet wide at the top, two feet wide at the bottom, two and one-half feet deep, and, to hold six tons, make it eighty feet long.

When on pasture, a 500 gallon milch cow should have around five pounds of grain mixture a day.

DOVIE NEWS

Rev. Smelser, of Abilene preached at the Dovie church last Sunday evening.

The subject for the League next Sunday evening will be, "Methods of Christian Action," with Slim Cooley as leader. Others having part on the program will be Herbie Faye Johnston, Morris Bessire, Milton Sharp and Lester Jenkins. After the League meeting, Rev. L. K. Malone will preach.

Mr. and Mrs. J. C. Green visited their son and his wife, Mr. and Mrs. Bennie Green in Big Spring.

Mr. and Mrs. L. B. Holden visited their daughter and her family, Mr. and Mrs. Claud Bessire in Stamford. Mr. and Mrs. L. B. Holden had as their guests, Rev. and Mrs. Smelser, of Abilene.

B. O. Townsend who has been visiting in the home of his daughter, Mrs. John Roberts in Anson spent Friday night in the home of Mr. and Mrs. Farmer.

Mr. and Mrs. Jim Miller have moved into the Townsend home.

Mrs. Wade Green went to Miracle, Sunday to visit her sister who had recently lost her home by fire.

An acre of sudan grass for late spring, summer, and early fall grazing, and an acre of oats, barley, or wheat pasture for late fall, winter, and early spring grazing, plus three tons of silage, is needed for each milch cow.

A milch cow should be dry for around 60 days each year to give her a chance to rebuild her body. This is one reason the average farm family needs two cows.

TYPICAL BOYS?

Here are the first two entrants in the nationwide contest to find the typical American boy. Above is Paul H. Redfield, 13, of Shortsville, N. Y. Below is Jack Heavey, 11-year-old youngster from Belmont, Mass. One boy from each of the six sections of the United States will be brought to New York late in March and the typical American boy will be chosen from the six finalists. The national winner will receive a prize of \$1000.

Adding machine rolls, 15c or two for 25c at the Herald Office.

Hamlin :: TEXAS

BORN: *Light . . . Sired by Private Initiative and Inventive Genius*

- Q. *Who invented the first electric light bulb?*
A. Thomas Alva Edison, now known as "the Wizard of Menlo Park."
- Q. *Was he ever assisted by governmental subsidies during the many long years he worked to perfect electric lights?*
A. No. Electric light is the result of private initiative and inventive genius on the part of a man who sought to make the world a better place in which to live.
- Q. *Did he succeed in doing that?*
A. Yes. Other individuals took up where he left off... constantly improving the light bulb Edison invented. Private industry, bent on spreading the use of GOOD LIGHT into every home in the land, learned how to manufacture the bulb more cheaply and efficiently.
- Q. *Whose money made this possible?*
A. Private citizens invested their money in the electric industry, thus making it possible to carry on the research that led to present-day low rates for light and power. West Texas, along with the entire country, has profited from the investment of private funds which now provide not only good light but contribute to the support of whole communities through employment of thousands of men and women and through payment of huge sums in taxes.
- Q. *Then Edison's invention has had far-reaching benefits for all?*
A. Yes. He—of all men—left the world a better place!

Hamlin Hatchery

CURTIS MARTIN, Mgr.

Hamlin :- :- :- Texas

Mr. and Mrs. Earl Smith returned Monday night from the Dallas Markets where they bought new spring merchandise for the Smith Dry Goods Company. While away they visited Mrs. Smith's sister in Fort Worth.

Wheat, itself, is an excellent livestock feed when it is not more valuable as a human food, and wheat pastures provide winter grazing in many sections.

Ink pads for sale at the Herald office—just the very thing for stamping eggs.

Wheat Gray Shorts—Low in fiber content and high in digestibility, wheat gray shorts or wheat flour middlings furnish about 12 per cent more total digestible nutrients per 100 pounds than wheat bran. Both are widely used by hog feeders, and are excellent for young pigs and calves because of their high digestibility.

Milch cows should have access at all times to an abundant supply of good, clean, cool water in the summer and good, clean, warm water in the winter.

McCAULEY MATTERS

By JOHN P. HARDESTY

Mrs. M. A. Connell of Morton, visited with her sister, Mrs. W. B. Mayo and Mr. Mayo, Tuesday and Wednesday of last week. Mrs. Connell operates a tourist camp at Morton.

Rev. and Mrs. J. L. Mayhew are the happy parents of a baby son who came to bless their home Jan. 28th.

J. M. Griffith is on the sick list, but is reported improving.

Mrs. John Brawner is reported to be suffering from an attack of the flu. Misses Ruth and Odie Hunter are also suffering a second attack of flu, but are improved at this writing.

There will be a special service at the local Baptist church next Sunday night for the Boy Scouts. They with their sponsors will be the special guests of the pastor and congregation. A suitable program will be given in their honor and in recognition of National Scout week. J. W. Hendrickson is the efficient Scout Master for the McCauley troupe.

Again the grim reaper has invaded the ranks of our citizenship. This time he took from our midst one of our finest and most respected neighbors, Mr. J. O. Faulkenberry, who died at the home of his son, Walter, Tuesday afternoon at 2:00 o'clock. Funeral services were held at the Baptist church, Wednesday afternoon at 2:30, conducted by his pastor, Rev. J. Lloyd Mayhew, assisted by the pastor of the Baptist church. Mr. Faulkenberry was born in Bartow county, Georgia April 7th, 1865. He was married to Adeline Cline, September 14, 1883. The family moved to Joshua, Texas in Johnson County in 1898; then to Fisher county in 1914, settling in McCauley community. He is survived by his widow and eight children, as follows: Walter, Lucius, Claud and Ira of McCauley Eldra, of Jacksonville; Henry of Lamesa; Mrs. Cora Barnes, Morton and Mrs. Nannie Barnes of Brownwood.

Mr. Faulkenberry suffered several paralytic strokes, the first some 6 weeks ago. He rallied and seemed to improve for some days. Then other attacks came and he failed to rally. Mr. Faulkenberry was a member of the local Methodist church. Burial was made in the McCauley cemetery under direction of Barrow Undertaking Company of Hamlin.

The Vivial Maddens have moved from the Rio Grande Valley back to McCauley, after being gone for some two years. Their many friends welcome their return.

The local Masonic lodge will observe Washington's birthday with a suitable program and a good "feed" on the evening of Feb. 21 at the Masonic hall. A good speaker has been invited to deliver an address, and the ladies will furnish the repast. All Masons are invited, along with such of their friends and members of their families as they

SAFEWAY

Tying Texas Telephones Together...

THESE HANDS ARE THE HANDS of a telephone cable splicer . . . building copper highways for your voice . . . joining together the hundreds of tiny wires in a telephone cable.

Good telephone service is the sum of thousands of jobs like this. Jobs done infinitely well each day, by 8,500 people who

work at switchboards or along the lines.

Upon the skill of these folks depends the effectiveness of the 24½ million dollars spent last year by the telephone company to operate its system in Texas . . . to give swift, accurate, friendly service, at a price that is reasonable to you.

SOUTHWESTERN BELL TELEPHONE CO.

YOU ARE INVITED TO VISIT THE BELL SYSTEM EXHIBIT AT THE GOLDEN GATE INTERNATIONAL EXPOSITION, SAN FRANCISCO

may designate as guests.

Tuesday, Feb. 7 was the 30th Wedding Anniversary of Mr. and Mrs. Walter Faulkenberry. They have the congratulations of a host of friends. A special song was rendered in their honor by Mead's Fine Bread Quartet on station KRBC. However, the occasion was saddened by the death of Walter's father on that day.

W. L. Boyd and Henry Albritton, cotton warehouse owners, spent most of the past two weeks re-roofing one of their big houses at Lorenzo. A storm lifted the roof and scattered it over the country. They returned last Friday.

"Every Winter had Terrible Colds"

Nurse's Grateful Letter

"I want to thank you for the wonderful cough and cold medicine, BUCKLEY'S MIXTURE. I bought the first bottle last winter, for the old gentleman whom I am taking care of, for he had had terrible colds every winter. The first dose helped, and after the third dose cold was gone—it does such quick work." Mrs. C. Davis. Don't take chances, for even the most stubborn, racking cough swiftly yields to the powerful influence of BUCKLEY'S MIXTURE (triple acting), the largest selling medicine for coughs, colds and bronchitis in all of cold Canada. Get a small bottle at any druggist anywhere. Safe and satisfaction guaranteed always.

WAGGONER DRUG CO.

Do not give cows high protein feeds such as cotton seed meal for two weeks prior to freshening nor for 10 days after freshening. Too much feed high in protein at this time might result in milk fever, Texas A. & M. College Extension Service dairymen say.

Less trying days!

MONTH in, month out, many women and girls obtain two-way benefit from Cardui. It aids in building up the whole system by helping women to get more energy from their food—and so increases resistance to the strain of functional periodic pain. Try it!

CARDUI

Cotton, still the South's chief money crop, brings only 54 per cent of the average price it brought between 1909 and 1914.

To dry a cow off give her nothing to eat except dry hay such as Johnson grass, sorghum, prairie, or sudan, and water. Milk the cow once a day for two or three days, then once every other day a couple of times, then quit milking. The cow should be perfectly dry after two weeks of this treatment.

Dry cows should be fed and put on good pasture to get them in good condition before freshening.

PLEASANT TO TAKE

There is no need to take a harsh laxative! There is a gentler way to relieve constipation! Just get a box of Rexall Orderlies, the phenolphthalein laxative which tastes like chocolate candy. It isn't bitter; it doesn't gripe or cause irritation; it moves sluggish bowels easily and thoroughly. Buy Rexall Orderlies at the Rexall Store.
